## Section 1: Overview of Assessment

This assignment assesses the following module learning outcomes:

- Analyse software architecture using suitable models and methods.
- Develop information systems using the techniques of Software Engineering Management.

This is a **Group-Based** assignment worth **30%** of the overall mark for the module.

This is a group demonstration of your process automation, which should not exceed **20 minutes**. Each member should present their contribution. Focus on demonstrating the alignment of the developed system with the client requirements.

The assignment is described in more detail in section 2.

If you have any questions about this assignment, please contact your module leader.

## Section 2: Task Specification

The purpose of the presentation is to demonstrate your working automation, including demonstration of user input. Link your demonstration back to activities and goals identified in your socio-technical model.

## Section 3: Deliverables

Please submit your **video presentation** up to **20 minutes** long.

## Section 4: Marking Criteria

Your assessment will be marked according to the following marking criteria.

You can use these to evaluate your own work before you submit.

| Criteria    | < 40%                                                                           | 40% - 59%                                                                                                                | 60% - 69%                                                                  | ≥ 70%                                                                                                                    |
|-------------|---------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>Demo</b> | The demonstration is poorly executed or fails to meet the 20-minute time limit. | The demonstration is well executed, meeting the 20-minute time limit and including contributions from all group members. | Individual contributions are clearly explained and demonstrate good depth. | The demonstration is excellently executed, and the developed system shows strong alignment with the agreed requirements. |

## Section 5: Feedback mechanisms

Summative feedback will be provided following submission.

## Section 6: Appendices

### 6.1 Completing your assessment

#### **Where should I start?**

This is a group-based assessment, so it would be good to get to know your group well. This would involve understanding the strengths and weaknesses of your team.

#### **What do I need to do to pass?**

The minimum overall mark to pass is 40% aggregated across all criteria following the marking scheme enclosed in this document.

#### **How do I achieve high marks in this assessment?**

Your presentation should be well coordinated and showcase contributions from all group members.

#### **How does the learning and teaching relate to the assessment?**

The lectures & practical sessions of Term 1 are related to this assessment.

#### **What additional resources may help me complete this assessment?**

UWE supports Panopto video capture, or you may use the video recording software of your choice. You can either download Panopto from Apps Anywhere or use the Panopto Capture tool in your browser.

Additional information will be provided about how to record and submit a Panopto video.

#### **What do I do if I am concerned about completing this assessment?**

UWE Bristol offer a range of Assessment Support Options that you can explore through [this link](#), and both [Academic Support](#) and [Wellbeing Support](#) are available.

For further information, please see the [Academic Survival Guide](#).

### 6.2 Assessment Offences

#### **How do I avoid an Assessment Offence on this module? <sup>2</sup>**

Explain things in your own words, not those of a machine. Use the support above if you feel unable to submit your own work for this module.

UWE Bristol's [UWE's Assessment Offences Policy](#) requires that you submit work that is entirely your own and reflects your own learning. It is important to:

- Ensure that you reference all your sources using [UWE Harvard](#) referencing. Use the guidance available on [UWE's Study Skills referencing pages](#).
- Avoid copying and pasting any work into this assessment, including your own previous assessments, work from other students or internet sources
- Develop your own style, arguments and wording. Avoid copying and changing individual words but keeping essentially the same sentences and/or structures from other sources
- Never give your work to others who may copy it
- If you are doing an individual assessment, develop your own work and preparation. Do not allow anyone to make amendments to your work (including proof-readers, who may highlight issues but not edit the work).

**When submitting your work, you will be required to confirm that the work is your own.** Text-matching software and other methods are routinely used to check submissions against other submissions to the university and internet sources. Details of what constitutes plagiarism and how to avoid it can be found on UWE's Study Skills [pages about avoiding plagiarism](#).

## 6.3 Use of Generative AI (ChatGPT or similar)

Generative AI may be used to suggest talking points but please ensure that any text is in your own voice.

- You may use generative AI to suggest talking points for your presentation.

## 6.4 Video capture

UWE supports Panopto video capture, or you may use the video recording software of your choice. You can either download Panopto from Apps Anywhere, or use the Panopto Capture tool in your browser.

It's important to remember that uploading a video is not the end of the submission process, you must still submit the video following the submission process below. Further guidance on installing and using Panopto, and instructions on submitting a video may be found below:

- **Installing and using Panopto**

<https://info.uwe.ac.uk/online/blackboard/students/guides/panopto>

- **Submitting Panopto videos**

<https://info.uwe.ac.uk/online/blackboard/students/guides/assignments/view-submit.asp>

Uploading a file to the 'My folder' area *does not constitute submission*. Submissions must be made using the *Panopto Video Student Video submission option from the add Content (+) button*. Using the Panopto Video option will result in no recording being added to the submission.

You can also upload videos (e.g. mp4) recorded with other software:

1. Blackboard > Tools > Panopto
2. From the 'Create' menu, select 'Upload Media'.
3. This upload is not a submission, until you've followed the steps below.

The submission process is:

1. Click on the "Presentation" heading in Assignments.
2. Click 'Write Submission'.
3. Click on the ellipsis (...) in the text editor
4. Click on 'Add Content', the + inside a circle icon (+)
5. Select 'Panopto Video Student Video submission'
6. select your video
7. click Submit Video
8. click Submit

You may receive "WARNING - You have not attached any files to this submission" This is OK as you have made a video submission only.

- It is good practice to do a short test recording in advance of the submission date.
- Don't leave upload until the last minute as file size and network speed may affect upload times.
- Each team need only submit one recording for the whole team.
